

CHANGES TO THE BUILDING INDUSTRY

Ceilite™ has revolutionised the Commercial Ceiling Industry and has changed how you will think when you next specify your commercial or industrial project.

With all emphasis on recycling, environmentally friendly and workplace health and safety, Ceilite™ has met all requirements of Environmental Choice Australia and has been given the green tick of approval.

You are, by now, asking what is this product and how can these statements be justified?

Well before we answer these relevant questions, firstly ask yourself “If I can specify a product that can be installed in a project and not add to the cost and in some cases save money, why wouldn’t I specify it?” The answer is obvious – Of course you would.

Now let me tell you some of the answers to the statements made above.

1. The product is manufactured from recycled materials
2. The product is 80% lighter than any current tiles available.
3. The product has acoustics and thermal properties
4. The product is Australian manufactured

Other impressive factors about this product are:-

- ❖ Available in larger sizes for an innovative new look
- ❖ Smudge resistant finish
- ❖ Available in non-standard sizes
- ❖ Double sided finish
- ❖ Water resistant to eliminate the ugly stains prevalent with standard ceiling tiles
- ❖ Clean & easy to maintain
- ❖ Accessible for plumbing & electrical services without minor damages
- ❖ Easy site clean up

Let Ceilite™ allow you the opportunity to specify a superior product and provide you with peace of mind for all your projects.
